

Publication Venues for IPE Scholarship

When considering publication venues, it is important to consider how the journal will help you reach your intended audience through the databases it's indexed in and open access on the internet. Impact factor, a metric calculated with the yearly average number of citations, may also influence publication decisions. All journals included in this table have published IPE or IPP content.

Category	Journal Title	Impact Factor	IPE/P in Scope or Instructions	Indexed in MEDLINE	Open Access (OA)	Additional Information
IPE/P journals	Journal of Interprofessional Care	1.645	✓	✓		
	Health and Interprofessional Practice		✓		✓	No fees for OA
	Journal of Interprofessional Education & Practice		✓		O ¹	Indexed in Scopus ; OA publication fee
	Journal of Research in Interprofessional Practice and Education		✓		✓	\$1,400 OA publication fee
Health journals	Advances in Health Sciences Education: Theory and Practice	2.462	✓	✓	O	\$3,000 OA publication fee
	BMC Health Services Research	1.606		✓	✓	\$2,145 OA publication fee
	International Journal of Integrated Care	1.557			✓	In PubMed Central , indexed in Scopus ; £1,250 OA publication fee
	Journal of Continuing Education in the Health Professions	1.112		✓		Indexed in Scopus
	Journal of Allied Health		✓	✓		0.587 Source-Normalized Impact Per Paper (SNIP) ² ; \$40 fee per page published

¹ O = Open access publishing is available in addition to the traditional subscription publishing model

² SNIP, [Source-Normalized Impact Per Paper](#), is a metric that considers the total number of citations in the subject field

Publication Venues for IPE Scholarship

Category	Journal Title	Impact Factor	IPE/P in Scope or Instructions	Indexed in MEDLINE	Open Access (OA)	Additional Information
Discipline-specific journals ³	British Journal of Sports Medicine	6.724		✓	○	£1,950 OA publication fee
	Medical Education	3.369	✓	✓	○	OA publication fee
	Physical Therapy	2.799		✓	○	\$2,000-\$3,500 OA publication fee
	Pharmacotherapy	2.592	✓	✓	○	OA publication fee
	Medical Teacher	2.355		✓	○	OA publication fee
	Journal of Advanced Nursing	1.917	✓	✓	○	OA publication fee
	Nurse Education Today	1.591	✓	✓	○	\$2,500 OA publication fee
	American Journal of Pharmaceutical Education	1.196	✓	✓	✓	No fees for OA

Citation Databases

- Use the citation databases *Web of Science* or *Scopus* to identify journals for publication
- Directions:
 1. Complete a topic search
 2. On the results page, click Analyze Results
 3. Rank the records by the “Source Titles” field
 4. Use “View Records” to see the articles published in the journal
- Alternatively, use the “Source Titles” filter on the left of the search results to view the result count by journal title

Journal Scope and Author Guidelines

- Journal Scope
 - Use the journal’s scope to determine whether your topic is a good fit for the journal
- Journal Sections and Manuscripts Accepted
 - Ensure that the type of manuscript best suited to your scholarship is accepted by the journal
- Author Guidelines
 - Follow all author guidelines to improve chances of acceptance
 - Example: the *Journal of Interprofessional Care*’s IPE Terminology list in the [Instructions for Authors](#)

Terminology

Given the ongoing terminological uncertainty within the interprofessional field, the Journal now employs a range of key terms – each with an associated definition*. Submitting authors therefore need to ensure they select terms that best describes the activities presented in their work. They should also ensure they use the selected terms consistently:

Disciplines are regarded as broad academic fields, with examples including, anthropology, economics, geography, social science and political science.

Interdisciplinary teamwork is an approach like interprofessional teamwork (see below) but differs as the team members are composed of individuals from different disciplines such as psychology, anthropology, economics and geography.

Interprofessional collaboration involves different health and social care professions who regularly come together to negotiate and agree how to solve complex care problems or provide services. It differs from interprofessional teamwork as colleagues do not share a team identity and work together in a less integrated and interdependent manner.
